1. OUTSTANDING FEATURES

JELTONET C1 is a special mixture of solvents designed for the cleaning of electric and electronic contacts; it allows to avoid sparkling and restores electrical constants. It possesses a very low superficial tension, allowing to reach surfaces to treat. It protects against the corrosion and assures a light lubrication. It can be used on markings or plastics.

2. TYPICAL APPLICATIONS

JETONET C1 is designed for the cleaning of :

- Relay, contacts,
- Collectors (generative engines),
- Caskets of operation,
- Switches, alternators, switches, batteries...

3. DIRECTIONS FOR USE

- ♦ Well shake the aerosol before use
- ♦ Place the capillary tube on the diffuser
- ♦ Vaporize directly on the surface to clean
- ♦ Let act some moments. In case of strong fouling or of former oxidation, rub the surface to clean by means of cottons - stalks (Ref. 3610) and then pulverize..

One can also use, first, JELTOSEC (Ref. 7321) to clean before treatment with JELTONET C1. The deposited coat of lubricant can be eliminated by means of the TRIJELT 13 E (Ref. 7331).

Attention : do not pulverize JELTONET C1 while the equipment is switched on.
